

inches (1.6 mm) in height and perpendicular to the inclined plane. The stop shall be positioned parallel to the bottom edge of the inclined plane and so that no portion of the device to be tested or its base touches the hori-

zontal surface. The device shall not tip over when the plane is inclined at 60-degrees from the horizontal. The procedure shall be repeated for each edge of the device.

§ 1508.1 Definitions.

For the purposes of this part:

- (a) *Full-size baby crib* means a bed (1) that is designed to provide sleeping accommodations for an infant, (2) that is intended for use in the home, and (3) that is within a range of ± 5.1 centimeters (± 2 inches) of the interior length or width dimensions specified for full-size baby cribs in § 1508.3.
